PROFESSIONAL SUMMARY

IT Operations and Service Desk professional with 5+ years of experience supporting mission-critical banking systems in one of Argentina's leading financial technology companies. Skilled in technical support, troubleshooting, incident management, system monitoring, backup administration, and cloud technologies including AWS and Azure Backup. Recognized for improving operational processes by developing internal tools that increased efficiency, reduced manual work, and enhanced asset tracking. Strong analytical, customer service, and communication skills with a proactive approach to solving technical problems.

TECHNICAL SKILLS

Technical Support • Service Desk • Incident Management • Troubleshooting • Windows • Linux • AWS Console • Azure Backup • SQL • Control-M • Backup & Recovery • System Monitoring • Customer Service • Documentation • Process Improvement

PROFESSIONAL EXPERIENCE

Information Security & Operations Analyst

Red Link S.A. - Buenos Aires, Argentina

May 2018 - February 2024

Supported mission-critical banking infrastructure used by financial institutions across Argentina.

- Monitored critical banking systems to ensure maximum availability.
- Investigated and resolved production incidents.
- Managed enterprise backup and recovery operations using Azure Backup.
- Supported Linux servers and AWS cloud services.
- Monitored scheduled jobs through Control-M.
- Executed SQL queries for data validation and troubleshooting.
- Managed backup media inventory and data integrity.
- Worked closely with infrastructure, security, and operations teams.
- Documented incidents and operational procedures.
- Participated in 24/7 operational support.

Key Achievement: Designed and implemented a digital tape inventory management system that replaced a manual paper-based process. The application replicated the physical tape library digitally, allowing barcode scanning to instantly identify each tape's storage location. The solution eliminated paper labels, reduced manual work, improved inventory accuracy, significantly reduced tape retrieval time, and optimized backup media management.

Busser

MILA Omakase

February 2025 - Present

- Support servers in a high-volume luxury restaurant.
- Ensure exceptional customer experience.
